

Sally Hurliaux, Comcast West Division Vice President, Engineering Operations

Sally Hurliaux is **Vice President of Engineering Operations, Headend, Systems Integration, and Critical Infrastructure (SIT & CI)** for Comcast's West Division. In this role, Sally is responsible for the engineering and technical aspects of network engineering, leading a team of over 350 across 13 states. She drives strategy for the Headend, SIT & CI teams while lending support to our Region and Division Construction, Technical Operations, Network Maintenance, and Finance groups. Additionally, Sally leads the daily operations of the West Division's 435 headend facilities and develops long-term plans in support of unrivaled customer experiences.

Sally has been with Comcast since 2007, holding various leadership positions across Network Evolution Strategy, Data Sciences and Engineering, Product Management, Integration Management, Project and Portfolio Management, Strategic Business Planning and Analytics, and more.

Prior to Comcast, Sally worked at Sprint Nextel and held roles in Program Management, Operations Strategy and Planning, Product Management, Backend Systems Management and Operational Deployments.

With her extensive experience and diverse background, Sally has a proven track record of successfully executing business needs, as well as building and developing successful organizations.

Sally is a Colorado native who enjoys spending time with family and friends, and taking advantage of all that Colorado has to offer including hiking, rafting, horseback riding and paddleboarding.
